[Foundations Of Earth Science 8th Ed. Lutgens And Tarbuck Pdf](#)

EAS 100
Study Guide to Textbook
Foundations of Earth Science
(Lutgens and Tarbuck, 5th edition, 2008)

The textbook for EAS 100, *Foundations of Earth Science*, by Lutgens and Tarbuck is an excellent book. It is up-to-date, "readable", has good illustrations and an appropriate treatment of the four subject areas - Earth Science, Oceanography, Atmospheric Science, and Astronomy - which constitute the subject matter for EAS 100. The book is of appropriate length for a one-semester course and the authors make an attempt to emphasize and identify fundamental concepts and terms and to illustrate these concepts with relevant and significant examples. Despite the quality of this textbook, the reader may "get lost" in the volume of material and in the detailed and extensive terminology that is used in the book and that is somewhat characteristic of these subject areas. This detail and terminology is necessary in a textbook in order for the book to be complete, authoritative, and useful as a reference. An example of this detail is the use of key terms (in bold print in the chapters and listed at the end of each chapter) which tend to confuse and divert the reader from developing an understanding of the material based on the significant concepts and principles in the chapters. Therefore, we suggest that the reader not try to memorize key terms, definitions or details. **The most effective way to study the material covered in EAS 100 using the textbook will be to use this Study Guide during your reading and review. The Chapter in Review section at the end of each chapter will also be useful in reviewing the chapter.**

The following study guide is intended to provide a list of the most important **concepts and principles (on the left)** and (a small number of) **key words (on the right)** which should be emphasized in reading the chapters of the textbook for EAS 100. In addition, the most important **Focus on Learning** questions (at the beginning of each chapter), **Figures to Study**, **The Chapter in Review** section, and **Questions for Review** for each chapter are also listed. The **Focus on Learning** questions at the beginning of each chapter can be considered to be the main learning objectives for the chapter. **The Chapter in Review** section also provides a convenient synopsis of the chapter for study after reading the chapter. **In EAS 100, we will cover only a portion of the book as given in the assigned reading in the Course Outline.** This Study Guide covers all of the chapters in the book. In addition, internet addresses, review questions and critical thinking exercises are provided in the on-line study guide for the text available at www.prenhall.com/lutgens. The CD-ROM, Geode, included with the book, also provides additional opportunities for study and learning.

INTRODUCTION (p. 1)

Focus on Learning: 1, 2, 3, 4, 5, 6, 7

The Earth Sciences
Earth as a System
Resources and Environmental Issues
Scientific Inquiry, Scientific Method

Hypothesis
Theory

Figures to Study: I.2, I.5, I.6, I.7, I.8, I.9, I.12

Review Questions: 1, 2, 6, 8
